

A 200-word RPG by Younès Rabii

Materials: 26 Scrabble tiles, one of each letter.

*The Samurai is the wielder of the Storied Sword.
This legendary weapon can grant its owner a single wish.
To possess it you must defeat the Samurai in a duel.*

You need this wish. Why?

Set the **S** tile aside. Draw a random tile.
✂ represents this tile's letter.

You're the ✂amurai. (If vowel, then ✂murai.)

Each choice must start with ✂.

- Choose your Weapon. (**B**ow, **Z**anbatō, etc.)
How does it reflect your personality?
- Choose your Totem. (**B**lood, **Z**ebra, etc.)
How does it help you fight?
- Choose your Weakness. (**B**umblng, **Z**eatot, etc.)
How does it make you look badass?

The **S**amurai has agreed to meet all challengers, but you only see the other ✂amurais. Is the **S**amurai one of them?

Place the **S** tile and other tiles for each player into a pile.
Everyone draws one tile. If you draw the **S** then you're the **S**amurai in disguise.
Why are you hiding? Did you make your wish?

A ✂amurai's actions always succeed.
Involving their Weakness, they always fail.

When ✂amurais are opposed, everyone draws a tile.
Draw two if your Totem helps. The letter closest to A wins.

A ✂amurai can survive only one wound.
